# 15th Annual European

## Pediatric Colorectal Pelvic Reconstruction Conference

### Presidents:

*Ivo de Blaauw and Marc Levitt*

### Scientific committee:

*Marc Levitt  
Roxana Rassouli-Kirchmeie  
Paola Midrio  
Ivo de Blaauw  
Martin Lacher*

*Carlos Reck  
María Fanjul  
Javier Ordoñez Pereira  
Alejandra Vilanova-Sánchez*

### Local Organizers:

*Alejandra Vilanova-Sanchez  
María Fanjul  
Javier Ordoñez Pereira  
Leopoldo Martínez  
Juan Carlos de Agustín*

## WEDNESDAY, OCTOBER 23rd 2024

### Scientific program

#### 7:45 • 17:00 h. **PEDIATRIC COLORECTAL WORKSHOP FOR TRAINEES AND JUNIOR FACULTY**

##### ■ **Morning: Anorectal malformations**

7:45 • 8:15 h. **Registration**

8:15 • 8:30h. **Welcome**

8:30 • 9:00h. Newborn diagnosis and management in ARM

9:00 • 10:15h. Steps of PSARP with video presentations

10:15 • 10:45h. **Break**

10:45 • 11:00h. Instruction for hands-on training on the model

11:00 • 12:15 h. Hands-on training PSARP on inanimate ARM models

12:15 • 13:00 h. **Lunch break**

##### ■ **Afternoon: Hirschsprung disease**

13:00 • 13:30 h. Neonatal diagnosis and treatment of HD

13:30 • 14:00 h. Basic pathology in HD

14:00 • 14:15 h. Lap/umbilical incision for intra-operative mobilization/biopsies

14:15 • 14:45 h. Steps of TERPT with video presentations

14:45 • 15:15 h. **Break**

15:15 • 15:30 h. Video of training on the model

15:30 • 17:00 h. Hands-on training TERPT on inanimate colorectal models

**THURSDAY, OCTOBER 24th 2024** (Aula Magna)8:00 • 8:30 h. **Registration**8:30 • 9:00 h. **Welcome**9:00 • 10:30 h. **FECAL DIVERSION IN ARM (1.5h)****Topics covered:** (some overlapping may be possible)

- Types of colostomy
- Is there a room for Ileostomy in ARM: how and when
- What is new on open and laparoscopic techniques?
- Ostomy in low-resource countries
- Complications associated with stomas

10 min per topic (50min) and 30/40 min discussion.

10:30 • 11:00 h. **Coffe break**11:00 • 12:30 h. **WHAT'S NEW IN ARM IN THE LAST 5 YEARS? PREOPERATIVE EVALUATION AND SURGICAL MANAGEMENT (1.5h)****Topics covered:**

- What is new in the preoperative evaluation?
- What are the new open techniques?
- What are the new technological advances that facilitate the dissection?
- What is new in the robotic approach to ARM?
- Artificial intelligence in pediatric colorectal surgery

10 min per topic (50 min) and 30/40 min discussion.

12:30 • 13:30 h. **LUNCH WITH THE EXPERTS****Topics by table:**

- Table 1: What to do after a PSARP wound dehiscence?
- Table 2: Perineal fistula: MINI PSARP at birth or dilations and wait?
- Table 3: How and when to transition from enemas to laxatives in ARM?

13:30 • 15:00 h. **WHAT IS NEW IN THE MANAGEMENT OF CLOACAL MALFORMATIONS: PREOPERATIVE, INTRAOPERATIVE, AND POSTOPERATIVE CONSIDERATIONS (1.5h)****Topics covered:**

- What are the results using the common channel and urethral length algorithm?
- Is MIS an option in cloacal malformations
- How to decide if the vagina should be pulled through?
- How about a vaginal replacement with bowel?
- What to do at puberty? Fertility potential? Obstetric considerations?

10 min per topic (50 min) and 40 min discussion.

15:00 • 15:15 h. **Coffee break**15:15 • 16:45 h. **UROLOGICAL NEEDS IN COMPLEX CONGENITAL PELVIC ANOMALIES (1.5h)****Topics covered:**

- Hypospadias in patients with ARM
- Consequences of leaving the UG sinus untouched in a cloaca
- Management of recurrent UTIs in patients with cloaca
- Risk factors for CKD in patients with cloaca
- Male ARM with single kidney and VUR

10 min per topic (50 min) and 40 min discussion.

16:45 • 17:30 h. **JEOPARDY GAME FOR ARM AND HD: GEOGRAPHIC BATTLE**

## FRIDAY, OCTOBER 25th 2024 (Aula Magna)

9:00 • 10:30 h. **NEW INSIGHTS IN HIRSCHSPRUNG DISEASE (1.5h)**

**Topics covered:**

- Is the TZ and the measurement of nerves as important as we think?
- Differences in management and outcomes in low and middle resource countries in HD
- MIS vs open/transanal: what is the best approach?
- Fertility and other unexpected issues in adult patients with HD
- Ongoing research in HD: What is the future?

*10 min per topic (50 min) and 40 min discussion.*

10:30 • 11:00 h. Coffee break

11:00 • 12:30 h. **TOTAL COLONIC AGANGLIONOSIS (1.5h)**

**Topics covered:**

- Updates in TCA. Is there anything new on the surgical management?
- IBD in HD
- Long term results: what does the literature say?
- Stoma care, urine sodium, perineal rash care, timing of the pull-through, treatment of hypermotility
- ERN working group research lines

*10 min per topic (50 min) and 40 min discussion.*

12:30 • 13:30 h. **LUNCH WITH THE EXPERTS**

**Topics by table:**

- Table 1: How to treat recurrent HAEC in patients with HD after the PT:
- Table 2: Malone vs cecostomy vs rectal flushes: How to decide what is best?
- Table 3: When to transition from flushes to enemas in HD

13:30 • 15:00 h. **ROLE OF THE PEDIATRIC SURGEON IN THE TREATMENT OF FUNCTIONAL CONSTIPATION (1.5h)**

**Topics covered:**

- Definition of constipation refractory to medical treatment: Complementary tests to diagnose types of FC
- Types of motility disorders
- What is the best surgical procedure to treat FC?
- Surgical management of refractory constipation in low and middle-resource countries
- What is new in the management of refractory FC in adults? New Medications and neuromodulation

*10 min per topic (50 min) and 40 min discussion.*

15:00 • 15:15 h. Coffee break

15:15 • 16:45 h. **ROLE OF PELVIC FLOOR PHYSICAL THERAPY IN COLORECTAL PROBLEMS (1.5h)**

**Topics covered:**

- Postoperative pelvic MRI in ARM and HD: is it helpful?
- Pelvic floor in adults with colorectal congenital malformations
- When do we have to send our patients to PFPT
- Which patients can benefit from pelvic floor PT?
- Patient perspective: Psychological and physical consequences in adults with ARM

*10 min per topic (50 min) and 40 min discussion.*

16:45 • 18:00 h. **ORAL PRESENTATIONS: CASE REPORTS**

**8 presentations: 3 min presentation and 5 min discussion**

20:30 h. Dinner
